

ALLOMATIC

AUTOMATIC
TRANSMISSION FILTER CATALOG

OE QUALITY TRANSMISSION FILTERS

**KEEP IT
CLEAN
WITH OE
QUALITY**

Allomatic transmission filters meet or exceed OEM requirements and provide consistent, reliable protection for every rebuild. Available for both domestic and import applications, our never-leak filters use high-strength, heat-resistant plastic plus premium filter media for maximum protection from debris. Allomatic's goal is to provide maximum value to customers. To do that, our products must meet the challenge of tough OE quality testing. Parts are considered acceptable for shipment only when they have successfully passed stringent quality tests required throughout the manufacturing process. Allomatic quality means service beyond on-time delivery to include timely and consistent sales service, full customer support and responsive new product introduction. Visit Allomatic.com/where-to-buy to find a distributor near you.
